

Hands On Day Camp

COVID-19 Protocols

Welcome to Summer Camp at the Hands On Children's Museum! We look forward to providing your child with an engaging, fun and safe learning experience. Our team is making modifications to our building, exhibits, and practices to follow and exceed local, state, and CDC camp guidelines. In addition, we are also incorporating the best practices in our field.

Some of our updates include:

- Small camp group sizes (8 campers)
- Each camper will be assigned cubby/storage space for the duration of the week
- Personal material kit caddies will be assigned to each camper, offering one-user only supplies for experiences throughout the day
- Camp groups will not mix
- Social distancing floor decals at project stations, tables, and exhibits
- Increased use of our Outdoor Discovery Area
- ASAP (As Safe as Possible) curriculum introduced on the first day of camps
- Increased cleaning of classrooms and facility
- Increased hand washing throughout the camp day, plus easy access to hand washing stations, hand sanitizer, and wipes throughout the museum
- Daily health screenings for everyone entering the building, including staff
- Per the [WA Secretary of Health](#), all staff and visitors 5 years and older must wear face coverings; (exemptions apply)
- Campers will have some time to explore Museum exhibits separate from the general public. This time will also be separated by camp groups.
- And more!

Please Note - staggered start and end times:

We have made some adjustments in support of our new efforts. The start and end time of your camp sessions may have changed slightly to help ensure staggered camp entry and allow ample time for cleaning between sessions. Please watch your email for details about your registration time and camp registration paperwork.
